Summary

Technology is my big passion. This is how we can connect people around the world, from all classes and cultures, and make things faster and functional.

I've started coding when I was 11 y-o, doing my own simple HTML/CSS websites and trying to make it better every day. Then I discovered PHP existence and started doing my own CRUD system for my geek blog. (HTML / CSS / PHP / JavaScript)

At the University, while studying physics, I've been part of GFRJ (Rio de Janeiro Rocket Team), in which I worked at Payload team, working as coder and doing scientific experiments (like a Cosmic Ray Detector) for the rockets and co-working with Avionics team (rockets system). We got 1st place at a Brazilian Competition and 3rd at International (Spaceport America Cup), in Best Solid Motor Rocket category. (Python)

Since 2018 I started working as freelancer for many important projects of Companies through Inventa Produtos Digitais. Then, in 2021, I started working for Loomer Tech, in which I improved my mobile development skills and many projects for the Company and its clients, getting Scrum Master position in 4 months. (HTML / CSS / (Sass/ SCSS) / PHP / JavaScript / C#.NET / React Native / Redux / WordPress / React.js / Next.js / API's / Scrum)

Then, in July 2021, I was hired by B2W Digital / Americanas S.A. as Software Developer, for Mobile Development with React Native, working directly with the international e-commerce team (Cross Border) in Soub! app development. (React Native / Redux / API's / Scrum)

Still growing up, improving my skills and getting better every day. Breaking my limits, achieving higher, going further.

Experience

Software Developer

americanas s.a.

Jul 2021 - Present (4 months +)

- App and Web Developer of the international e-commerce division.
- Developer of the new Soub! mobile app in React Native.
