Summary

Software Developer with great experience in mobile development, using React Native and Flutter; and web development, using React.js, Angular.js, HTML, CSS, SCSS, Sass and JavaScript ES6/7/8.

Quite familiar with technologies like Node.js and Redux. Furthermore, as working in mobile development using React Native, I have learned a little of Android and iOS native languages; and also developed some systems using C#.NET and other ones using Python.

In search of more experience and self-development, to improve my tech skills and to be part of great projects. And I guess this Company is a great opportunity for me to achieve that.

I am moving to England with my wife - who is UX/UI Designer - in August 2022.
